SUMMARY

As an aspiring Software Developer, I bring strong skills in full-stack development and automation, with a keen ability to optimize functionalities and enhance customer experiences. My proficiency in Java, Python, and other languages make me adept at crafting scalable solutions.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

PSNA College of Engineering and Technology

2025

- CGPA - 7.5

Higher Secondary Certificate (HSC)

Achyuta Public School

2021

- PERCENTAGE - 83%

Secondary School Leaving Certificate (SSLC)

Shri Maharishi Vidya Mandir

2019

- PERCENTAGE - 77%

SKILLS

Programming Languages	Java, Python, SQL, HTML, CSS, JavaScript
Frameworks And Libraries	React, Mendix
Tools	GIT, Figma, VS Code
Cloud And DevOps	AWS Cloud Architecting, Docker
Software Development	UI/UX Design, Prototyping, API Integration, Version Control (GitHub)
Data Science And Analysis	SQL Queries, Machine Learning, Data Visualization
Soft Skills	Problem-solving, Communication, Collaboration, Organization, Prioritization
Additional Skills	Responsive Web Design, Object-Oriented Programming, Creative Problem-solving, IT Support, DSA (Data Structures and Algorithms)

PROJECTS

Intelligent Traffic Surveillance and Offense Detection System

YOLOv8, Tesseract OCR

- Built a real-time vehicle tracking and violation detection system using computer vision techniques.
- Collaborated with the team to test functionality and resolve application-level issues.
- Enhanced system accuracy through OCR-based number plate recognition.

AI-Powered E-Commerce Recommendation System

Python, HTML, CSS, Java, React

- Built a personalized recommendation system using collaborative, content-based, and hybrid filtering models.
- Improved click-through rate by 15% for over 10,000 users using real-time query analytics.
- Enhanced product discovery and customer satisfaction, similar to industry platforms like Amazon.

LearnNow Training Management

Mendix

- Developed an end-to-end training management app with course creation, scheduling, and role-based access.
- Enabled educational admins to manage teachers, trainees, and courses with ease.
- Contributed to live projects during internship at Siemens, showcasing proficiency in scalable low-code solutions.

FIT-X

Figma UI/UX, HTML, CSS, JavaScript

- Designed and developed a responsive platform to help users plan personalized, sustainable diets.
- Focused on intuitive UI and seamless user experience using Figma prototyping and modern frontend tech.

EXPERIENCE

Vulture Lines Pvt Ltd

Full Stack Developer Intern 2025

- Developed an AI-powered recommendation system using collaborative, content-based, and hybrid models.
- Leveraged real-time query analytics to improve product relevance and increase customer buying rate.
- Implemented scalable backend logic and improved customer engagement metrics, inspired by Amazon-style systems.

Siemens Industry Software (India) Pvt Ltd

Web Developer Intern 2024

- Designed and deployed LearnNow Training Management System using the Mendix low-code platform.
- Implemented role-based access, course scheduling, and administrative dashboards for educational use.
- Contributed to live production features, showcasing efficiency in rapid low-code development.

CERTIFICATIONS

Mendix Rapid Developer

Foundational, Mendix

- Developed a Mendix application for course management, enhancing user experience and engagement through efficient scheduling and management features.

ACHIEVEMENTS

Participation in Dr. Kalam Young Achievers Award

World Youth Federation 2023

- Exhibited leadership and innovation by participating in the Dr. Kalam Young Achievers Award, reflecting commitment to advanced development methodologies.
